

Carefully complete the journal check.

On the flip side there are 4 learning targets that I want you to consider.

Think carefully before you rate your understanding of the learning targets.

I can use an equation to calculate the speed of a moving object.

Mechanical Monsters.

Distance.

m

Trial (Seconds)	(Blue) law Dawgs	orange. Ghost Mountain rides
1		
2		
3		
avg		

Figure 1

Round to 2 decimal places....

$d=580\text{m}$
avg $t =$

Law Dawgs

$$s = \frac{d}{t}$$

$$s = \frac{580\text{m}}{43.04\text{s}}$$

$$s = 13.48\text{m/sec}$$

$d=580\text{m}$
avg $t =$

Ghost Mountain riders

$$s = \frac{d}{\Delta t}$$

$$s = \frac{580\text{m}}{44.59\text{s}}$$

$$s = 13.01\text{m/sec}$$

Figure 1

What was the average speed of each team?
How much faster was the winning team?
