Mono Lake

#2

Write this vocabulary in your journal

Producers: *(Plants) organisms that make food from sunlight, and do not eat any other organism.*

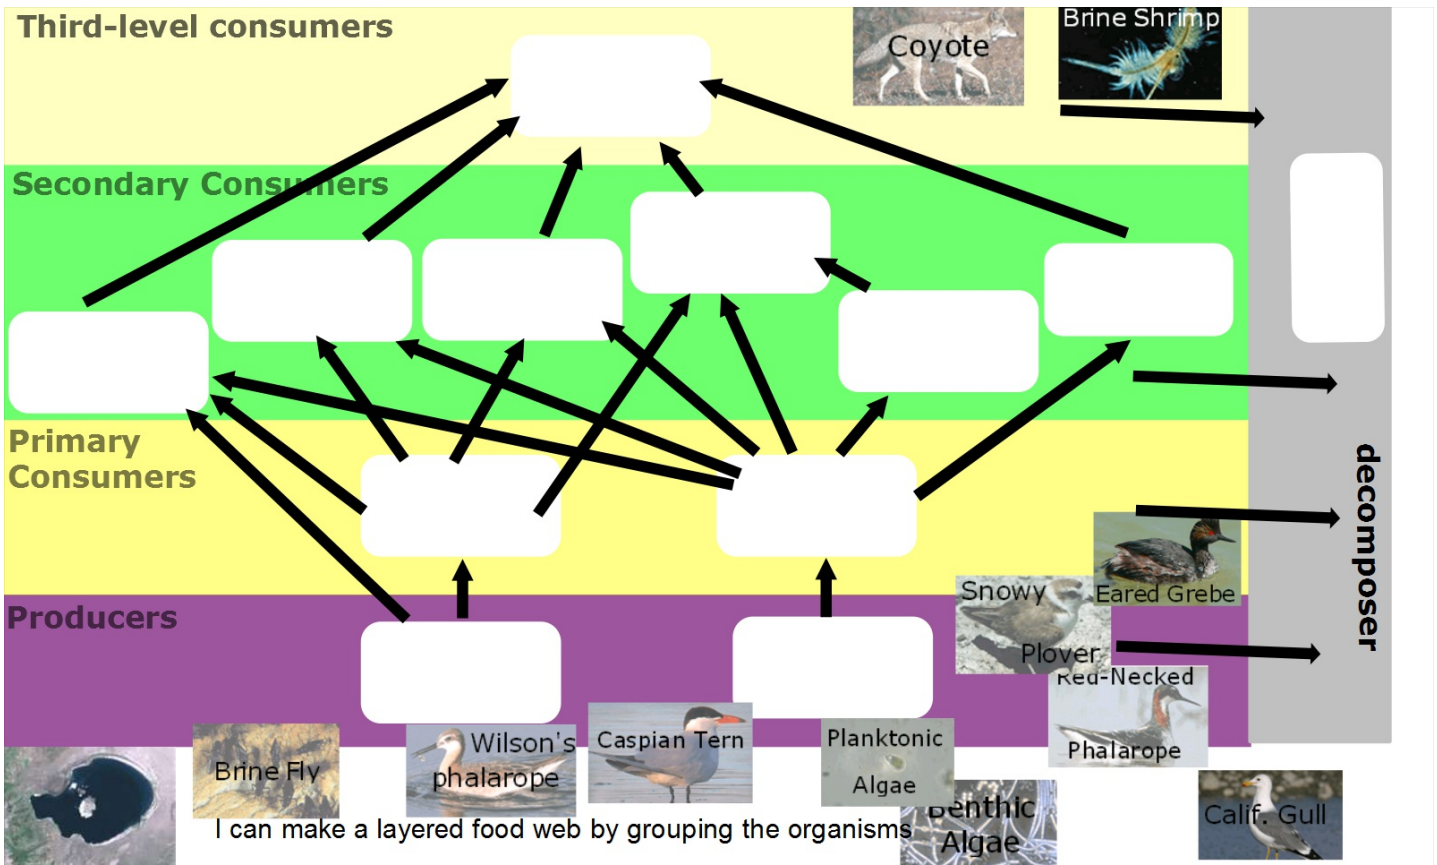

Primary consumers:(herbivores) *Organisms that only eat plants*

Consumers: *organisms that eat other living organisms.*

Decomposers break down dead organisms into simpler substances.

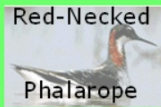

I can make a layered food web by grouping the organisms

Third-level consumers

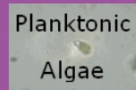

Secondary Consumers

mono Lake

#2

1. What do you notice about the way this food web has been organized?

2. What can we do to show the energy transfers for the bacteria?

I can make a layered food web by grouping the organisms
