

Limiting factors: What are some of the possible factors that might limit the growth of populations in the Arctic ecosystem?

As you watch this program look for trophic levels, photosynthesis and food webs.

Learning

target: I can identify biotic and abiotic factors that limit population growth and demonstrate my understanding with examples from multiple ecosystems.

Quiet Work Time

Put your **full name** on top of the green packet:

1. Complete the 1st page as you read pages 22-24 "Limiting Factors"
2. Use the graphs in your packet to answer the 5 questions.
3. When you finish, work on the crossword on the back.

Learning target: I can identify biotic and abiotic factors that limit population growth and demonstrate my understanding with examples from multiple ecosystems.
